EUROPEAN WORKSHOP ON HEALTHY LIVING WITH HIV 2020

BARCELONA, SPAIN • 6 - 7 NOVEMBER 2020

Our mission is to help the European community of future clinical leaders who embrace an updated and relevant paradigm for the optimal care of HIV-infected individuals.

This workshop focuses not only on viral suppression but also looks at guaranteeing optimal health throughout one's lifetime and strives to develop a clinical setting where treatment decisions consider all their implications for long term health.

FACTS AND FIGURES

 **88%** of the participants agree that this program is beneficial for the clinical management of their patients

 **93%** of the participants reported that they will incorporate what they learned into their patient care.

ABSTRACT TOPICS

- Care of aging people with HIV
- Mental health in people living with HIV
- Value-based healthcare and quality of life (VBHC in HIV care, how to use VBHC to optimize quality of life, mental health care for people living with HIV)
- Optimizing clinical management in HIV care (optimizing treatment regimens, new drug options)
- Co-morbidities in people living with HIV (cardiovascular and metabolic, renal, bone, neurological)
- Using e-health to optimize HIV care (digital health interventions in HIV care, social media, and HIV care)
- Unique challenges in women and female adolescents living with HIV
- Promoting family and social engagement in people living with HIV

THIS WORKSHOP WILL

- Educate you on new treatment options and their long-term implications
- Increase your level of understanding of options for prevention of co-morbidities and adverse events
- Help shift your focus to the management of long term health
- Encourage a pro-active and protective treatment attitude
- Broaden the scope of HIV clinicians and enrich their view of the HIV patient from other medical disciplines
